

Cboe Europe Limited - Benchmark Statement

Family of Benchmark: Cboe Europe Equity Benchmarks

Description: Cboe Europe Equity Benchmarks are classified as non-significant regulated-data benchmarks under the EU Benchmarks Regulation.

The input data used to calculate the indices is sourced from Cboe Europe as a Recognised Investment Exchange except for the Cboe UK Alternative 100 where the input data is sourced from NEX – another Recognised Investment Exchange.

Cboe Europe Equity Benchmarks are constructed and managed to reflect the performance of listed companies and industry sectors pertaining to the relevant national or regional markets.

Geographical boundaries: Cboe Europe Equity Benchmarks reflect the performance of listed companies in Europe and in specific sectoral classifications.

For a more detailed description please refer to the [Rules and Methodology](#) where more information on the geographical and sectoral classifications can be found as well as how the indices will be calculated in case of extreme market and company events.

ISINs: All ISINs are available under the following [link](#).
