

Cboe Europe Indices – Notification

Client notification April 2020

Publication Date: 7 April 2020

Cboe Europe (Cboe) are currently in the process of changing how Cboe calculates and disseminates real-time Cboe Indices data. The complete list of impacted indices can be found [here](#).

Currently, Cboe utilises a third party firm to calculate and disseminate the real-time Cboe Indices. These indices are distributed directly from the Stuttgart Exchange and via licensed data vendors. Effective **Tuesday 1st December 2020**, Cboe will calculate and disseminate the indices data from the Cboe distribution platform in Equinix LD4.

If you currently access the data through a vendor, please ensure you will still be able to receive the data through your normal channels from **Tuesday 1st December 2020** by checking that your vendor has successfully cutover prior to this deadline.

The Cboe Index Data team will be working to ensure a smooth transition with minimal impact to licensees and end users. As part of this transition Cboe will be reaching out to all affected vendors over the coming weeks.

Please contact the [Index Data Team](#) if you have any immediate questions or concerns.
